Premise : Ancient doorbell

▶ Have you ever experienced the frustration of knocking some ones door constantly and realize lately, that there is no one inside ??

• Did you ever miss an appointment with some one just because you were late by 5 minutes to reach home?

• Wouldn't it be nice if you could know who all have visited your house when you were at office ?

If you answered any of those
questions with an yes, this product
will be surely of your choice.

Presenting the new generation smart doorbell..

Camera->

<-Infrared sensor

The Smart Bell

LED display->

Buzzer->

<-Speaker

<-Microphone input

- You think this is just an ordinary
  electronic door bell ??

.......Think Again !!

KEY FEATURES:

- ✓ Auto detection of a person, when he comes in front of the door.
- ✓ Takes photographs automatically.
- ✓ Sends information collected to the house owner via email or other cloud services.

Key features continued..

- ✓ If the owner wants, he can video chat with the person at the door.(This totally depends on how active the owner is at checking his/her emails/other notifs)
- ✓ The owner can set his status about what time the owner returns home.
- ✓ The bell can be re-functioned smartly using mobile applications(The power of IOT).

APPLICATIONS:

- ✓ Residential flats.
- ✓ Shopkeeper and store owners.(They can communicate with their customer remotely when their store remains closed)
- ✓ ANY KIND OF ORDINARY BELL COULD BE REPLACED WITH THIS SMART BELL.

DOWNSIDES

- ✓ Cost(for a basic version of this bell takes around 1500rs,where as a normal bell would be around 250rs, but comes with huge advantages for a time conservative person)
- ✓ That's it.

SO, LETS START KNOCKING THE SMART WAY.........

THANKYOU
